List of tables - Liste des tableaux

Title	Page	Titre
1 Estimate of total mid-year population and percentage of female population	1	Estimations de la population totale en milieu d'année et pourcentage de la population féminine
2 Age structure of the population	3	Structure de la population par âge
3 Average annual growth rates of total and urban population and percentage of population in urban areas	4	Taux de croissance moyen annuel de la population totale et urbaine et pourcentage de la population urbaine
4 Age dependency ratio	5	Rapport de dépendance démographique
5 Total fertility and Gross reproduction rates		Indice synthétique de fécondité et reproduction
6 Crude birth and Death rates		Taux brut de natalité et taux brut de mortalité
7 Economic dependency ratio		Rapport de dépendance économique
8 Distribution of economically active population by sector and by sex	9 - 11	Répartition de la population active par secteur et par sexe
9 Estimates of activity rates	12	Estimations des taux d'activité
10 Survival indicators	14	Indicateurs de survie
11 Literate population 15 years of age and over by sex	15	Population alphabète âgée de 15 ans et plus selon de sexe
12 Students enrolled at first level of education by sex	16	Elèves inscrits dans l'enseignement du premier degré selon le sexe
13 Gross enrolment ratios for primary education by sex		Taux brut d'inscription dans l'enseignement premier degré selon le sexes
14 Students enrolled at second and third levels of education	18	Elèves inscrits dans l'enseignement secondaire et supérieur
15 Gross enrolment ratios for secondary and higher education	19	Taux brut d'inscription dans l'enseignement secodaire et supérieur
16 Health care indicators	20	Indicateurs de soins de santé
17 Access to social and health facilities	21	Accès aux facilités sociales et sanitaires
18 GDP at current market prices	22	PIB aux prix courants du marché
19 GDP per Capita at current market prices In U.S. Dollars	23	PIB par Habitant aux prix courants du marche en Dollars des E.U.
20 Annual growth rates of GDP per capita at 1990 constant market prices	25	Taux de croissance du PIB par habitant aux prix constants du marché de 1990
21 GDP by kind of economic activity at constant 1990 factor cost	26	PIB par genre d'activité économique au cout des facteurs constants de 1990
22 Expenditure on GDP at 1990 constant market prices	28	Emplois du PIB au prix constants du marché de 1990
23 Consumer Price Index	30	Indice des prix la consommation
24 Average annual percentage change of central government tax revenue and expenditure	31	Taux d'accroissement moyen annuel des recettes et dépenses du budget général
25 External Public Debt Outstanding And Disbursed	32	Encours De La Dette Publique Et Exterieur
26 Central Government Tax revenue and Expenditure as percentage of GDP	34	Recettes fiscales et dépenses du budget général experimées en pourcentage du PIB
27 Total Imports and Exports	35	Importations et exportations totales
28 Trade Balance	36	Balance Commercial
29 Total Intra-African trade by country and subregion (Import)	39	Ensemble du commerce Intra-Africain par pays et sousregion (Importations)
30 Structure of exports	0	Structure des exportations
31 Structure of Imports	0	Structure des Importations
32 Relative Importance of principal export commodities in 2002 and 2003	54	Importance relative des principaux produits d'exportation en 2002 et 2003

	Title	Page	Titre
33	Carbon dioxide emissions	56	Emissions d'anhydride carbonique
34	Production of fuelwood	57	Production des bois de chauffage
35	Bagasse, total production	59	
36	Production, trade and consumption of Energy	60	Production, commerce et consommation d'énergie
37	Production of Agriculture, Fishery and Forestry (selected commodities) Developing Africa	64	Production de l'agriculture, de la pêche et de la sylviculture (produits sélectionnés) Afrique en développement
38	Agricultural Production by Broad Group	64	Production agricole par grands groupes
39	Information and Telecommunication indicators	66	Indicateurs de la Information et Communication

List of charts - Liste des graphiques

	Title	Page	Titre
1	Midyear Population	2	Population en milieu d'année
2	Estimates of activity rates	13	Estimations des taux d'activité
3	GDP per Capita at current market prices in U.S. Dollars	24	PIB par habitant aux prix courants du marché en dollars des E.U.
4	External public debt outstanding and disbursed	33	Encours de la dette publique et extérieure décaissée
5	Imports by ECA subregion	37	Importations par sous-région de la CEA
6	Balance of trade by ECA subregion	38	Balance commerciale par sous-région de la CEA
7	Share of African exports in World trade 1995, 2000 and 2003	0	Part des exportations de l'Afrique dans le commerce mondial 1995, 2000 et 2003
8	Share of African imports in World trade 1995, 2000 and 2003	0	Part des importations de l'Afrique dans le commerce mondial 1995, 2000 et 2003
9	Carbon dioxide emissions	58	Emissions d'anhydride carbonique
10	Production of primary energy	62	Production d'énergie primaire
11	Consumption of commercial energy	63	Consommation d'énergie commerciale
12	Index numbers of total food production	65	Indices de la production alimentaire totale

TECHNICAL NOTES

The purpose of the Technical notes is to outline the scope of the data presented and to indicate as far as possible the concepts, definitions and classification involved. Readers are advised to also consult country specific notes in the African Statistical Yearbook for further detail.

DEMOGRAPHIC AND SOCIAL INDICATORS

Table 1 and Chart 1:

Estimates are based on: UN World Population Prospects, the 1998, and 2000 revisions.

Total mid-year population refers to the de facto (present-in-area) population, unless otherwise stated.

Table 2:

The age groups used in this table are the following: 0-14 years, 15-64 years and 65 years and over.

Table 3:

The annual growth rate is the average annual percentage rate of population (total and urban) growth between two years, computed using the mid year estimate and an exponential rate of increase.

Regarding the percentage of population in urban areas, users should be aware of different definitions used by countries. The following example illustrates the range: Algeria: all communes having as chef-lieu either a city, a rural town or an urban agglomeration; Central African Republic: 20 principal centers; Ghana: localities of 5,000 or more inhabitants; Senegal: agglomerations of 10,000 or more inhabitants

Table 4:

The age dependency ratio relates youths under 15 years of age and persons of 65 years and above to the population aged 15 and 64 years of age. This indicator shows therefore the number of dependents which each 100 persons in the productive age segment of the population have to support.

Table 5:

The total fertility rate is the average number of children that would be born per woman if she experiences no mortality and were subject to a given set of age-specific fertility throughout her life time. The gross reproduction rate is the average number of live daughters born to a hypothetical female birth cohort which would be subject to a set of age-specific fertility on the assumption that mortality on before the end of reproductive age is zero. The gross reproduction rate is thus equal to total fertility by the proportion of births of daughters.

NOTES TECHNIQUES

L'objet des notes techniques est de présenter dans leurs grandes lignes, autant que possible, la portée des statistiques consignées dans les tableaux ainsi que la méthodologie, les concepts et définitions utilisés pour leur élaboration. Pour plus de détails le lecteur peut aussi se référer aux notes spécifiques par pays contenues dans l'Annuaire statistique pour l'Afrique

INDICATEURS DEMOGRAPHIQUES ET SOCIAUX

Tableau 1 et graphique 1:

Base des estimations: Les perspectives d'avenir de la population mondiale de l'ONU, 1998 et révisions 2000

Sauf indication contraire, la population totale en milieu d'année se réfère à la population de fait (personnes présentes).

Tableau 2:

Les groupes d'Age utilisés dans ce tableau se rapportent aux suivants: 0-14 ans, 15-64 ans et plus

Tableau 3:

Le taux d'accroissement annuel est le taux annuel moyen de variation (en pourcentage) de la population (ensemble, urbain) entre deux années, calculé à partir estimations en milieu d'année utilisant le taux exponentiel d'accroissement.

En ce qui concerne les pourcentages de la population en milieu urbain, le lecteur devra comprendre que les pays utilisent des définitions différentes du mot "urbain" comme le montrent les exemples ci-après: Algérie: Toutes les communes ayant comme chef-lieu une ville, une ville rurale ou une agglomération urbaine; République centrafricaine: les 20 principaux centres urbains; Ghana: localités de 5000 habitants et plus; Sénégal agglomérations de 10 000 habitants et plus.

Tableau 4:

Le rapport de dépendance démographique se définit ainsi: la population de moins de 15 ans + la population de 65 ans et plus, divisée par la population de 15 à 64 ans. Ce rapport est un indicateur qui mesure le nombre de personnes dépendantes que 100 personnes en âge de travailler doivent prendre en charge

Tableau 5:

L'indice synthétique de fécondité est le nombre moyen de naissance qu'une femme soumise à un ensemble de fécondités spécifiques par âge, pourrait avoir au cours de sa période de procréation. Le taux brut de reproduction rapporte le nombre de naissances féminines vivantes à la cohorte hypothétique de naissances féminines que serait soumise à un ensemble de fécondités spécifiques par âge, en supposant que la mortalité avant la fin de la période de reproduction est nulle. Le taux brut de reproductions est donc égal à l'indice synthétique de fécondité que multiplie le proportion des naissances féminines.

Table 6:

Crude birth and death rates relate the number of live births and the number of deaths, respectively, to the average size of the population in the given year. The ratio is expressed per 1000 population

Table 7:

The economic dependency ratio relates to the number of economically inactive to the number of economically active persons.

Table 8:

The economically active population comprises all employed and unemployed persons (including those seeking work for the first time). It covers employers persons working on their own account, salaried employees, wage earners, unpaid family workers, members of producers' co-operatives and members of the armed forces.

Table 9 and Chart 2:

The activity rate is defined as the ratio of the economically active population to the total population.

Table 10:

This table shows three health related indicators: Life expectancy at birth, Infant mortality rate and under five years mortality rate.

Life expectancy at birth is the number of years a newborn infant would live if the prevailing pattern of mortality of the total population at the time of his/her birth were to stay the same throughout his life. Infant mortality rate is the number of deaths infant under one year of age per 100 live births in a given year. Under 5 years mortality is the rate of the number of death of children under 5 years of age per 1000 live births in a given year.

Table 11:

Literacy is defined as the ability both to read and to write. Thus, a person is literate who can, with understanding, both read and write a short, simple statement on his/her everyday life.

Table 12 and 14

These tables show the number of students enrolled at each level of education, for each country.

Table 13 and 15

The gross enrolment ratio is the total enrolment of all ages related to the population in age groups corresponding to primary, secondary and higher education age levels. Data for all educational indicators are based on the information contained in the UNESCO Statistical Yearbook, supplemented by National Publications and estimates.

Tableau 6:

Les taux de natalité et de mortalité sont calculés en rapportant le nombre de naissances vivantes et celui de décès respectivement, à la taille moyenne de population d'une année donnée. Le rapport est exprimé pour mille habitants.

Tableau 7:

Le rapport dépendance économique est le rapport entre le nombre des économiquement inactifs et la population économiquement actif.

Tableau 8:

La population économiquement active comprend toutes les personnes employées ou non (y compris celles qui cherchent un emploi pour la première fois). Elle recouvre les employeurs, les travailleurs indépendants, les salariés les rentiers, les travailleurs familiaux non rémunérés, les membres des coopératives de producteurs et ceux des armées.

Tableau 9 et graphique 2:

Le taux d'activité se définit comme le rapport de la population économiquement active à la population totale.

Tableau 10:

Ce tableau montre trois indicateurs de santé: L'espérance de vie à la naissance, Le taux de mortalité infantile et le taux de mortalité de moins de 5 ans.

L'espérance de vie à la naissance indique le nombre d'années que vivrait un nouveau-né si les tendances de la mortalité observées pour l'ensemble de la population au moment de sa naissance restaient inchangées tout au long de son existence. Le taux de mortalité infantile est le nombre de décès d'enfants de moins de un an pour 1000 naissances de mortalité des moins de 5 ans exprime le nombre de décès d'enfants de moins de 5 ans pour 1000 naissances vivantes au cours d'une année donnée.

Tableau 11:

L'alphabétisme est défini comme la capacité de lire et d'écrire, en le comprenant, un exposé simple et bref des faits en rapport avec sa vie quotidienne.

Tableau 12 et 14

Ces tableaux montrent le nombre des élèves inscrits, par niveau d'enseignement dans chaque pays.

Tableau 13 et 15

Le taux d'inscription brut dans l'enseignement est le rapport entre l'effectif scolaire inscrit et la population par groupe d'âge correspondant aux niveaux primaire, secondaire et supérieur. Les données de tous les indicateurs relatifs à l'enseignement ont pour source les informations contenues dans l'Annuaire statistique de l'UNESCO et complétées par les publications nationales et estimations.

Table 16

This table shows three health related indicators. Indicators presented here are: Population per physician, population per nurse and population per hospital bed.

Table 17

This table refers to the percentage of the population with reasonable access to safe water supply which includes treated surface water or untreated but uncontaminated water such as that from springs, sanitary wells, and protected boreholes. Also the table refers to the percentage of the population that can reach appropriate local health services by the local means of transport in no more than one hour.

Data are presented separately for total, urban and rural population.

ECONOMIC INDICATORS

Table 18

Gross Domestic Product (GDP) measures production without the value of intermediate consumption. It is calculated as the producers' value of the gross final output of goods and services of producers resident in a country less the purchaser's value of their intermediate consumption plus import duties. It is calculated without making allowance for depreciation.

GDP at current market prices, expressed in US dollars, is based on the current price series in national currencies and the application of annual weighted average exchange rates for converting the total value of trade from national currencies into US dollars.

Table 19 and Chart 3

GDP per capita in US dollars is calculated by the dividing the GDP in current price (table 18) by the population data given in the table 1.

Table 20

Annual growth rates of GDP per Capita at 1990 constant market prices relate the annual changes in GDP to the increases of the estimated mid-year population.

Table 21

The headings for GDP by kind of Economic activity reflect the major divisions of the International Industrial Classification of all Economic Activities (ISIC) in the following manner:

Agriculture also includes hunting, forestry and fishing;

Mining and Quarrying;

Manufacturing includes ISIC divisions 31-39;

Other industries include electricity, gas, and water and construction;

Services include wholesale and retail trade and restaurants and hotels; transport, storage and communication; financing, insurance, real estate and business services; community, social

Tableau 16

Ce tableau montre trois indicateurs de santé. Les indicateurs présentés ici sont les estimations du nombre d'habitants par médecin, par infirmier et par lit d'hôpital.

Tableau 17

Ce tableau présente le pourcentage de la population ayant accès raisonnablement à une source d'eau potable qui comprend les surfaces d'eau traitée ou non mais contaminées, telles que les sources, les puits d'eau salubre et les trous de mine protégés remplis d'eau. Le tableau présent aussi le pourcentage de la population qui peut se rendre en moins d'une heure dans les centres de santé locaux, en utilisant les moyens de transport habituels.

Les données sont présentées séparément pour la population totale, urbaine et rurale.

INDICATEURS ECONOMIQUES

Tableau 18

Le Produit Intérieur Brut (PIB) mesure la production diminuée de la consommation intermédiaire. C'est la valeur de la production des biens et services des producteurs résidents du pays moins la valeur aux prix d'achat de leurs consommation intermédiaires plus les droits et taxes sur les importations. Il ne tient pas compte des amortissement.

Le PIB aux prix courants du marché exprimé en dollars des EU a été obtenu sur la base des séries relatives aux prix courants en monnaies nationales auxquelles il a été appliqué les taux de change moyens annuels pondérés pour convertir la valeur totale du commerce extérieur exprimée en monnaies nationales en dollars des EU

Tableau 19 et graphique 3

Le PIB par habitant en dollar des Etats-Unis est calculé en divisant les données de PIB en dollar courants (tableau 18) par les données de population du tableau 1.

Tableau 20

Les taux d'accroissement annuel du PIB par habitant aux prix constants du marché de 1990 rapportent les variations annuelles du PIB à celles des chiffres de population estimés en milieu d'année.

Tableau 21

Le PIB par genre d'activité économique reflète les principales catégories de la Classification internationale type, par industrie, de toutes les branches d'activité économique (C.I.T.I.) comme suit:

L'Agriculture comprend aussi: chasse, forêt, pêche;

Les Industries extractifs;

Les Industries manufacturières comprennent les catégories 31 à 39 de la C.I.T.I.;

Les Autres industries comprennent: électricité, gaz, eau, bâtiments et travaux publics;

Les Services comprennent: commerce de gros et de détail; restaurants et hôtels; transports, entrepôts et communication; banques assurances, affaires immobilières et services fournis aux

and personal services.

GDP at factor cost differs from GDP at market prices by the inclusion of indirect taxes net of subsidies in the latter

Table 22

Expenditure on GDP at 1990 constant market prices comprises: (1) + (2) + (3) + (4) - (5). The items are as defined below.

- (1) Government expenditure consists of all current expenditures made by general government for the purchase of goods and services (including wages and salaries of government employees) less sales of goods and services by government; included are the capital outlays of government services durable goods for national security and defense.
- (2) Private expenditure is the final consumption expenditure of households and non-profit institutions serving households.
- (3) Gross capital formation comprises gross fixed capital formation and increase in stocks. Gross fixed capital formation consists the outlays of industries, producers of government services and producers of private non-profit services to households, on additions of new durable goods (commodities) to their stocks of fixed assets less their net sales of similar secondhand and scrapped goods. Excluded are the outlays of government services on durable goods for national defense and security. Included are acquisitions of reproducible and non-reproducible durable goods, except land, mineral deposits, timber tracts and the like, for civilian use; work in progress on construction projects; capital repair; outlays on the involvement of land and on the development and extension of timber tracts, plantations, vineyards etc. which take considerably more than a year until they become productive; the acquisition of breeding stock, draught animals, dairy cattle and the like; and the transfer costs in connection with purchases and sales of land, mineral deposits timber tracts, etc.
- (4) Exports of goods and services consist of all transfers of the ownership of goods from residents of a country to non-residents and services provided by residents producers of the country to non-residents.
- (5) Imports of goods and services consist of all transfers of the ownership of goods from non-residents to residents of a country and services provided by non-resident producers to residents of the country.

Growth rates are calculated from constant prices series. The shares of GDP are calculated from current price series.

Table 23

Consumer price index is the average change over time in the prices paid by the ultimate consumer of a specified basket of

entreprises; services fournis à la collectivité, services sociaux et services personnels.

Le PIB au coût des facteurs diffère du PIB aux prix du marché par l'inclusion dans ce dernier des imports indirects nets des subventions.

Tableau 22

Les emplois du PIB à prix constants du marché de 1990 comprennent: (1) + (2) + (3) + (4) - (5). les postes se définissent comme suit:

- (1) La consommation final des administration publiques comprend toutes les dépenses courantes d'achat de biens et services (y compris les traitements et salaires des employés des administrations publiques) moins les ventes de biens et services des administrations publiques; plus les dépenses des administrations publiques en biens durables pour la défense national.
- (2) La consommation privée représente les dépenses de consommation finale des ménages et des institutions privées sans but lucratif au service des ménages.
- (3) La formation brut de capital se compose de la formation brute de capital fixe et de la variation des stocks. La formation brute de capital fixe comprend l'ensemble des dépenses effectuées par les industries, les administrations publiques et les institutions privées sans but lucratif au service des ménages les dépenses consacrées à améliorer ou à modifier les biens durables déduction faite de leurs ventes nettes de biens d'occasion ou de rebuts analogues. Elle n'inclut pas les dépenses des administrations publiques relatives à l'achat des biens durables destinés à la défense et la sécurité nationales. Elle inclut les acquisitions des biens durables à usage civil à l'exception des terres, des gisements miniers des forêts et des biens analogues; les travaux en cours des projets de construction, les rénovations d'ouvrages; les dépenses de mine en valeur des terres, le développement et l'extension des zones boisées des plantations, des vignobles, etc. qui deviennent productifs après un an ou moins; l'acquisition de bétail, des animaux de trait, les animaux laitiers et analogues; et les coûts de transferts relatifs aux acquisitions et ventes de terres, de gisements miniers, de zones boisées etc.
- (4) Les exportations de biens et services comprennent l'ensemble des opérations effectuées par un résident avec un non-résident et portant sur un bien ou un service.
- (5) Les importations de biens et services comprennent l'ensemble des opérations effectuées par un non-résident avec un résident et portant sur un bien ou un service.

Les taux d'accroissement sont calculés à partir des séries à prix constants. Les parts relatives du PIB sont calculées à partir des séries à prix courants.

Tableau 23

L'indice de prix à la consommation montre l'évolution dans le temps des prix d'un panier spécifique de biens et services payé par le consommateur final. La couverture géographique et le contenu

goods and services. Both geographic and item coverage vary from country to country. In some countries, the index relates only to the capital city, while in other it may relate only to urban centers or to selected urban and rural localities. With respect to item coverage, the general index (A) may include or exclude rent. For the food index this may include or exclude beverages and tobacco. Both indexes may apply to different income groups: high, middle and low.

Table 24

Table 25 and Chart 4

External public debt outstanding and disbursed represent the amount of public and publicly guaranteed loans disbursed and outstanding at the end of each year, net of repayments of principal and write-offs

Table 26

Central government relates to all units that are agencies or instruments of a country's central authority and whose jurisdiction extends to all parts of its territory. Expenditure includes all non repayable payments by government, whether required or unrequired and whether for current or capital purposes.

Table 27, 28 and Charts 5, 6, 7, 8

As a general guideline, international trade statistics cover all merchandise. That is as far as possible, all goods that add to or subtract from the stock of material resources of a country as a result of their movement into or out of the country.

Exports are valued f.o.b. (free on board) and imports c.i.f. (cost, insurance and freight). In the categorization of exports and imports the Standard International Trade Classification (SITC), Revision 2, has been used as follows:

Section

0 – Food and live animals, chiefly for food;
1 – Beverages and tobacco;
2 – Crude material, inedible, except fuels;
3 – Mineral fuels, lubricants and related materials;
4 – Animal and vegetable oils, fats and waxes;
5 – Chemicals and related products, n.e.s;
6 – Manufactured goods, classified chiefly by material;
7 – Machinery and transport equipment;
8 – Miscellaneous manufactured articles;
9 – Commodities and transactions not classified elsewhere in the SITC

Tables 30, and 31

In the categorization of imports, food items refer to commodities in SITC Section 0. Fuels are commodities in Section 3. Machinery and transport equipment are the commodities in Section 7. Other manufactured goods are the commodities of Section 5, 6 and 8. Other relates to Section 1, 4 and 9.

du panier varie d'un pays à l'autre. Dans certains pays, l'indice est seulement calculé pour la capitale, tandis que dans d'autres il peut concerner soit tous les centres urbains, soit des localités urbaines et rurales choisies. S'agissant des articles, l'indice général (A) peut inclure ou exclure le loyer. L'indice relatif aux produits alimentaires peut également inclure ou exclure les boissons et tabacs. ces deux indices peuvent s'appliquer à différentes classes de revenus: haut revenu, revenu intermédiaire et faible revenu.

Tableau 24

Tableau 25 et graphique 4

L'encours de la dette publique extérieure et décaissée représente les emprunts contractés et garantis par l'État et qui sont décaissés à la fin de chaque année nets des remboursements et des annulations.

Tableau 26

Le terme Administration centrale concerne l'ensemble des entités qui sont des agences ou des instruments de l'autorité centrale d'un pays et dont la juridiction s'étend sur l'ensemble du territoire de ce pays. Les dépenses comprennent l'ensemble des paiements non remboursables effectués par les administrations centrales, qu'ils soient avec ou sans contrepartie et qu'il s'agisse de transactions courantes ou en capital.

Tableau 27, 28 et graphique 5,6, 7 et 8

Les statistiques du commerce extérieur couvrent toutes les marchandises. Aussi loin que possible, toutes les marchandises qui ajoutent ou soustraient les stocks de ressources matérielles d'un pays en raison de leur mouvement dans ou hors du pays.

Les exportations sont évaluées franco à bord (FOB) et importations C.a.f. (coût, assurance et fret). Dans la catégorisation des exportations et des importations la classification de commerce international standard (CTCI), la révision 2, a été utilisée comme suit:

Section

0 - Nourriture et animaux vivants, principalement nourriture;
1 - Boissons et tabac;
2 - Matériel brut, non comestible, à l'exception des carburants;
3 - Carburants minéraux, lubrifiants et matériaux relatifs;
4 - Huiles animales et végétales, graisses et cires;
5 - Produits chimiques et produits connexes;
6 - Produits manufacturés, classifiés principalement par le matériel;
7 - Machines et équipement de transport;
8 - Articles manufacturés divers;
9 - Des produits et les transactions non classifiées ailleurs

Tableaux 30, et 31

Dans la catégorisation des importations, articles relatifs à la nourriture se rapportent aux produits des section 0 de la CTCI. Les carburants sont des produits dans la section 3. Les machines et l'équipement de transport sont les produits dans la section 7. D'autres produits manufacturés sont les produits de la section 5, 6 et 8.
