Senior Leadership Position Curriculum Vitae (CV)

Position: Commissioner Infrastructure and Energy (I&E)

Personal Information:

Name:	Amos Marawa
Physical Address:	4 Kingfisher Close, Greystone Park, Harare, Zimbabwe
E-mail Address:	amarawa@hotmail.com
Phone Number:	+263712899705/+263772593099
Date of Birth (dd/mm/yy):	25/10/57
Nationality:	Zimbabwean
Citizenship:	Zimbabwean
Gender:	Male

Vision Statement *(In not more than one thousand (1,000) words, outline how you intend to achieve the aspirations set out in Agenda 2063 and address the most pressing issues facing Africa and the Commission in this role)*

I intend to use my qualifications, skills and vast knowledge and experience in regional integration and infrastructure development attained through working for COMESA and the Africa-EU Strategy to give support to and to contribute to the achievement of the 7 aspirations and 20 goals of the Agenda 2063. The goals are more transformational in nature as they relate to the citizens wellbeing i.e. high standards of living, education, health and nourishment, food security and nutrition, environmental sustainability and climate change, unity, economic and financial stability, human rights, good infrastructure and services, peace and security and respect for the African nation. Whilst the Aspirations of the Agenda 2063 are more developmental in nature and are:

- 1) A Prosperous Africa, based on Inclusive Growth and Sustainable Development;
- 2) An Integrated Continent Politically united and based on the ideals of Pan Africanism and the vision of African Renaissance
- 3) An Africa of Good Governance, Democracy, Respect for Human Rights, Justice and the Rule of Law
- 4) A Peaceful and Secure Africa
- 5) Africa with a Strong Cultural Identity Common Heritage, Values and Ethics

AFRICAN UNION

Fax: 251115518718/251115536950 Website: www.au.int

- 6) An Africa Whose Development is people driven, relying on the potential offered by African People, especially its Women and Youth, and caring for Children
- 7) An Africa as a Strong, United, Resilient and Influential Global Player and Partner.

Infrastructure and Energy development can be a key catalyst for the attainment of the Agenda 2063 Aspirations in general and in particular through the successful achievement of Aspiration 1. I intend to use my vast experience and knowledge to enhance the convening power of the AUC through the Infrastructure and Energy Department to engage and collaborate with Member States and regional and international institutions to come up with policies and programmes and promote and support the Agenda 2063 priorities. I will also vigorously engage the Development partners and regional and international cooperating for financial and technical support for continental programmes and priorities for Agenda 2063. This will also require enhancing cooperation and strengthening the relationship and cooperation with Regional Economic Communities in order to harmonise and rationalise the regional integration programmes.

At the AUC level I intend to collaborate and work with the other commissioners to ensure we come up with integrated planning and that will allow cross-sectoral joint programming and alignment and harmonisation of programme implementation and monitoring and evaluation.

Skills and Competencies (In not more than five hundred (500) words, demonstrate how your experience and qualifications match the skills and competences outlined in the role profile of the position you are applying for)

I possess relevant qualifications and have a strong professional experience in steering and overseeing the coordination of regional infrastructure development programmes and in particular in the overall cross-sectoral coordination of energy, water, transport and ICT programmes in Africa and EU in general and in particular in Eastern and Southern African region covering countries in the COMESA, EAC, SADC and IGAD that has enriched my leadership capabilities on management quality and effectiveness, technical, administrative and logistical coordination, communication, accountability and sound financial management and results oriented activities implementation.

Complementing my experience in overall coordination and implementation infrastructure development activities in the domains of energy, transport, water and ICT, is my practical understanding of projects and programmes funded by development partners. In addition to managing the *donor funded programmes under the Africa – EU Strategy*, I have also participated in a number of activities funded by AfDB and other African financial institutions.

I have extensive experience at a senior level in positions that bridge infrastructure development strategy, policy and regulation and coordination practice through direct engagement and advocacy with the Governments of the Members States the ESA region, primarily through sustained work with Ministries of responsible for Infrastructure Development at national/regional level coordinating the Technical and Ministerial Infrastructure Committees Meetings including High –level Infrastructure Investments Conferences and Summits of Heads of State and Government. I have extensive experience in organizing and facilitating the technical and ministerial committee meetings and investment conferences and summits through administrative and logistical support as well processing the technical inputs and outputs of the meetings. I have developed a wide network and contacts in Ministries responsible for Infrastructure development Africa and EU in general and in particular in the Eastern and Southern Africa region as well as regional and sub-regional infrastructure related institutions such as AUDA-NEPAD (NPCA).

I have experience of working in the areas of coordination of continental and regional infrastructure development programmes and in particular in the overall cross-sectoral coordination of energy, water, transport and ICT at

cross-regional and African continental level. I participated in the implementation of continental infrastructure projects and programmes such as YD, SAATM, PIDA, Agenda 2063 jointly with AUC and other RECs which were financially supported by international cooperating and development partners such as the European Commission, World Bank, etc. My broad range of experience has given me a deep understanding of the infrastructure development challenges facing the African continent and in particular the poor, small and vulnerable countries in Africa.

I have developed a wide-ranging network of strong professional ties in a number of key regional and international which include European Commission, ACP Secretariat, AUC, RECs, and development partners.

In addition to contributing to a number publications, panel discussions and presenting as guest speaker at regional and international high – level investment conferences on infrastructure, I have developed a track record of honesty, goal-oriented dedication and positive attitude to work, team spirit that is coupled with ability to work and mix with people of different cultural backgrounds and interests.

Achievements/Accomplishments: *(In not more than five hundred (500) words, indicate any other achievements besides those under work experience you would like to highlight)*

I have reviewed technical articles on transport for the Chartered Institute of Transport, U.K from 1989-1991 in addition to being a Panellist and Presenter on air transport topics at various international air transport conferences from 1991 – 2000. I have also been a Judge for the COMESA Media Awards as well as the Zimbabwe Media Awards in the Transport and infrastructure Domain since 1992.

Vision Statement *(In not more than one thousand (1,000) words, outline how you intend to achieve the aspirations set out in Agenda 2063 and address the most pressing issues facing Africa and the Commission in this role)*

One of Africa's key challenges is poverty, despite the enormous resources available within the African continent. The contribution of the African continent to global trade and investment is dismal, yet trade and investment is the sustainable way to generate wealth and hence reduce poverty within the continent. There is considerable research evidence that infrastructure services facilitate industrialization, regional integration, trade and investment that in turn generates wealth.

With this in mind, the African Union has done a commendable job in identifying key areas of intervention that should be undertaken across the entire African continent by Member States, as envisioned in Agenda 2063. As a specialist in infrastructure, my vision is not only to promote infrastructure provision within the continent, but also lobby stakeholders in planning and developing infrastructure that seeks to connect people, enable business, improve livelihoods. For instance, with regard to development of a high - speed rail, and under my leadership as Permanent secretary in the

ministry of Transport in Kenya, Kenya successfully commissioned development of the standard gauge rail to connect the strategically important port of Mombasa to the Kenyan capital (Nairobi) and onwards to Uganda and Rwandese capitals of Kampala and Kigali.

Furthermore, I was involved at the highest levels in conceiving the LAPPSSET project that has as its goal the vision of utilising high-speed rail network to transform the economically marginalised northern Kenya region and connect Kenya to its northern neighbours (Ethiopia and South Sudan).

These two projects highlight my conviction in Agenda 2063 that the African continent can be transformed through strategic Infrastructure and Energy projects.

As a highly qualified and experienced professional in the area of infrastructure, with high level experience in policy formulation, infrastructure development, finance and management, I am well placed to champion the projects and programmes on infrastructure and energy as stated in Agenda 2063.

Executive Profile: (In not more than three hundred (300) words, provide a summary and highlights of your relevant skills, experience, goals and accomplishments)

I am a highly qualified and experienced infrastructure professional, with high level experience in both the public and private sector. I have also acquired senior level leadership in international organisations such as the African Development Bank. Having served the government of the republic of Kenya as Permanent Secretary in several ministries, I have demonstrated effective leadership at the highest levels in government. I have successfully delivered several infrastructure projects, especially in Kenya, while participating in regional projects. I have experience at the national, regional and international level, that I will bring to the role of Commissioner, Infrastructure and Energy at the AU.

Skills and Competencies *(In not more than five hundred (500) words, demonstrate how your experience and qualifications match the skills and competences outlined in the role profile of the position you are applying for)*

As a highly qualified and experienced infrastructure professional, with high level experience in policy formulation, infrastructure development, finance and management, I am uniquely suited for the role of Commissioner, Infrastructure and Energy at the African Union.

The extensive experience striding across both project/programme level management and executive senior public sector management that I have been fortunate to acquire, will enable me to drive the implementation of Infrastructure and Energy policies, programs and strategies in line with the aspirations of Agenda 2063.

I have the capacity to effectively engage at all levels with Member States in order to pursue the Commissions work to promote domestication of AU Agenda 2063 at the national level by Member States.

My experience of working at the African Development Bank's headquarters, and working closely with regional economic institutions/communities will be useful in my role as leader of the Infrastructure and Energy portfolio at the Commission.

My recent role as Permanent Secretary in the Government of the Republic of Kenya has equipped me with top level government experience and skills that I will bring to the role of Commissioner at the AU.

Achievements/Accomplishments: *(In not more than five hundred (500) words, indicate any other achievements besides those under work experience you would like to highlight)*

In my capacity as Chairman, Development Committee within the Anglican diocese of Embu, I have led development of several church projects as part of my personal social responsibility in my home county of Embu in Kenya. I derive satisfaction when I serve the community, utilising my skills as an expert in the field of infrastructure.

Vision Statement *(In not more than one thousand (1,000) words, outline how you intend to achieve the aspirations set out in Agenda 2063 and address the most pressing issues facing Africa and the Commission in this role)*

1. My vision is to turn the COVID-19 crisis into an unprecedented opportunity for our Continent to leapfrog and “ Build Better , Smarter and More Resilient Africa”
2. Rationale
Energy and Transport sectors, must include the implementation of innovative strategies to address the current economic challenges, embracing technology and the move to digitalisation. The consequences of Africa’s response to COVID-19 are likely to give rise to compelling opportunities. The immediate imperative is to kick-start inclusive economic growth by restoring confidence, attracting investment, and implementing infrastructure projects which will lead to near-term employment gains, and which then support inclusive growth, resilience and recovery over the medium and long-terms.
3. Infrastructure As Catalyst For Quality Growth, Integration & Resilience
Our Continent’s post-COVID19 recovery hinges upon robust re-imagined Infrastructure plans marked by key-drivers , namely (i) acceleration of energy access and transition, (ii) spur of

AFRICAN UNION

الاتحاد الأفريقي

UNION AFRICAINE

UNIÃO AFRICANA

Addis Ababa, Ethiopia P. O. Box 3243 Telephone: 251115517700/251115526373

digitalisation across sectors, (iii) scale-up smart, resilient and inclusive transport, and (iv) support operationalisation of AfCFTA and flagship projects

3.1 Accelerating Energy Access and Improving the Energy Mix

Increasing access to electricity in Africa through regional programmes such as NEPAD and AREI, as well as 'on-grid' and 'off-grid' renewable energy presents a major opportunity in the context of African-owned growth model that is sustainable, inclusive and resilient. Smart energy transition - AU plans going forward should re-emphasise energy transition consistently with resilient, climate-smart and scale up initiatives such as stand alone energy solutions, AREI, PIDA energy programmes and the harmonisation of energy frameworks and operationalise the african energy market.

Innovation - Renewable energy is the next sector likely to see a digital revolution in Africa. Increasing the use of smart solutions will bring more flexible and connected solutions which in turn will help improve the transmission and distribution lines and help meet energy demand across the Continent. Efficiency - An important component of energy transition and mix improvement is energy efficiency through the work of AFREC.

Clean Cooking - AU plans should drive faster actions to meet energy access goals and to call for an approach to tackle the clean cooking crisis.

3.2 Spurring Digitalisation

By increasing productivity and facilitating innovation, technology is a key sector for the economic development. To expedite Africa's economic recovery and resilience the continent will need to accelerate its digital transformation, through the implementation of the harmonised approach of Africa's Digital Transformation Strategy, especially the linkages with sectors as digital health, education, commerce, identity, financial transfers, the fast tracking of ICT PIDA projects as well as the operationalisation of the Malabo convention and capacity building in terms of cybersecurity and data confidentiality.

3.3 Scaling-Up Smart, Resilient & Inclusive Transport

Green and inclusive transport infrastructure can tackle environmental vulnerabilities, produce green jobs and economic opportunities while availing the needed access to services and physically connecting rural and urban areas as well as the economic centres across the Continent.

3.4 Support to Africa's Continental Free Trade Area & Flagship Projects

Successful operationalisation AfCFTA will have a profound impact on the continent's infrastructure sectors. The AfCFTA provides an entirely new platform to expand these efforts regionally and pursue infrastructure development to relieve the infrastructure restraint. AfCFTA agreement is also likely to encourage africans to rethink our infrastructure supply chains and look at regional and local supply chains more.

4. Key Considerations

4.1 Gender empowerment

Women's and communities' health, wellbeing and socio-economic development are strongly interlinked with equal access to infrastructure and technologies.

4.2 Climate resilient-infrastructure

To increase Africa's resilience, promote quality growth, and speed up efforts to end extreme poverty, investment in resilient infrastructure is fundamental. COVID-19 pandemic has amplified calls for infrastructure to be resilient and adaptable.

AFRICAN UNION

4.3 Smart solutions

We should think big on digital development. Digital technologies offer us a chance to unlocking new pathways across all sectors for rapid economic growth, innovation, job creation and access to services.

5. Guiding Principles

- * Instill and strengthen synergies across
- * Catalyse and mobilise partnerships
- * Improve, integrate and harmonise regulations
- * Ensure universal access to smart, resilient and sustainable infrastructure
- * Factor in gender equality, climate resilience and innovative smart solutions

Executive Profile: (In not more than three hundred (300) words, provide a summary and highlights of your relevant skills, experience, goals and accomplishments)

International development expert with in-depth knowledge of socio-economic development challenges and opportunities in Africa & Middle East at political, strategic and operational levels, spearheading impactful initiatives and programmes especially on digitalisation, universal energy access, corporate governance, environmental action & gender empowerment. 35 years of service in leading positions in international organisations and private banks. Brings a strong mix of knowledge and experience, heading large and complex organisations and programmes, forging strategic synergies and partnerships with regional, international and multilateral organisations. Leading AU infrastructure, energy and tourism programmes with remarkable visibility, synergy, impact and results. Active global stakeholder and partner in various Commissions and boards; A proactive and strategic thinker, initiator and implementer, promoting team spirit, innovation and openness. Proven track record of working effortlessly and effectively across cultures, constituencies and stakeholders. Multi-disciplinary advanced degrees from world prestigious academic institutions. Recipient of numerous international honours and awards for integrity, excellence, innovation, impact and leadership.

*Raising Africa's image and visibility and effectively promoting and positioning African priorities in global fora, plans and strategies

*Leading Africa's digitalisation, innovation and adoption of new technologies, renewable energy, universal energy access, energy for cooking, to help the Continent leapfrog, ensuring prominent place for private sector development and partnership, continental digital transformation and tourism initiatives

*Launched second phase of African Infrastructure Programme emphasising smart, gender sustainable criteria and role of private sector; Post 2020 road safety african position; African domain DotAfrica, Initiative for Digital Africa; AU-EU task forces on digitalisation, transport and energy

*Accelerated implementation of the Single African Air Transport market
