## EXECUTIVE COUNCIL

Thirty-Third Ordinary Session
25 - 29 June 2018

# REPORT OF THE COMMISSION ON THE <br> STRUCTURAL AND FINANCIAL IMPLICATIONS FOR THE AFRICAN SPACE AGENCY (AFSA) 

# REPORT OF THE COMMISSION ON THE STRUCTURAL AND FINANCIAL IMPLICATIONS FOR THE AFRICAN SPACE AGENCY 

## I. Background

1. The African Union is aware of the unique opportunities for the continent to collectively address socio-economic development over the next 50 years through our people centered Agenda 2063. This agenda recognizes the critical role of space science and technology and has identified among its flagship programmes an "African outer space programme" that enables the continent to harness space sciences, technologies and innovations for Africa's growth and transformation.
2. In response to this growing need for Africa to develop a well-structured Space Policy and Strategy that could guide the continent to implement a globally competitive Outer-Space Programme that would enable Member States to harness its space resources in a more coordinated and systematic way, address the continent's challenges, and develop an African space market and industry the Executive Council through decisions EX.CL/Dec.744(XXII), EX.CL/Dec.746(XXII) and EX.CL/Dec.739(XXII) and recommendations from Sectorial Ministerial Conferences, called upon the Commission to develop a continental space policy.
3. In January 2016, through decision Assembly/AU/ Dec.589(XXVI), the Heads of State and Government adopted the African Space Policy and Strategy (annex 1) as a step towards the realization of an African Outer-Space Programme to develop in the continent capacities in (i) Earth Observation, (ii) Satellite Communication, (iii) Navigation and Positioning, and (iv) Space Science and Astronomy. In this decision the Assembly requested the Commission to evaluate the legal, structural and financial implications for the African Space Agency and report to the Assembly through the relevant structures. The African Space Agency is a critical institutional arrangement for an inclusive architecture of a continental outer-space programme that engages the national and regional institutions in the final collective implementation of the Space Policy and Strategy.
4. There has been remarkable progress thereafter. Some Member States have already through the call by the Commission in 2017, expressed their intent to host this African Space Agency according to the criteria for hosting the AU organs EX.CL/195/REV.1. In January 2018, the Assembly adopted the Statute of the African Space Agency through decision Assembly/AU/Dec.676(XXX) following the recommendation by the Specialized Technical Committees on Education, Science and Technology (STC-EST) in Cairo in October 2017, and the Justice and Legal Affairs (STCJLA) in November 2017. The Statute establishes the African Space Agency as an Organ of the African Union. The Statute articulates mandate, governance and management and functions of the Space Agency.
5. In direct implementation of Assembly/AU/ Dec.589(XXVI), the Commission carried out consultations with various African space stakeholders and end-users including Regional Economic Communities, national institutions and the private sector to evaluate the structural and financial implications for the African Space Agency, hereby submitted for consideration by the relevant AU policy Organs for further guidance.

## II. Proposed Structure of the African Space Agency

6. The proposed structure of the African Space Agency comprises of the Office of the Director General as articulated in Article 15 of the Statute of the Space Agency and shall be responsible for the overall management of the Agency and under it are the following offices:

## (i) Corporate Services

This office handles the administrative operations of the Agency and is made up of the following:
a) Legal Affaires
b) Human Resources
c) Finances
d) Procurement
e) Facility management
f) Security
(ii) Policy and External Relations

This office provides policy and strategic planning of the Agency and further manage intra-Africa and international multilateral relations, partnerships and, communication and outreach. It is made up of the following:
a) Strategic planning, Cooperation, partnership and Liaison
b) Policy and strategy
c) Communication and outreach
(iii) Space Applications

This is a technical Office for building Africa's space capacities focusing in particular on operational segments articulated in the African Space Policy and Strategy with a strong focus on maximizing the convergence of technologies and their crosscutting nature for a coherent and unique Africa Outer Space Programme. It is made up of the following:
a) Earth Observation Program
b) Satellite Communication Program
c) Navigation and Positioning Program
d) Astronomy, Space Exploration and Outer Space Science Program
(iv) Space Operations \& Technology

This Office manages all the space systems, infrastructure, technologies and their operations. All the missions are designed here. It also manages the safety and mission insurance. It is made up of the following:
a) Safety, Mission Planning and Assurance
b) Systems, Robotics, Space Infrastructure Management
c) Assembly, Integration and Testing
(v) Innovation, Research \& Development

This Office is responsible for research and development, capacity development and knowledge management. Since innovation, research and development leads to spin-offs in the space market, the Office also manages industry and business development with strong collaboration with private sector. It is made up of the following:
a) Space industry and Business Development
b) Capacity, Learning and Skills development
c) Knowledge Management
(vi) Information Technology

This component is about providing the necessary information technologies needed to support the space systems and all the Agency daily activities. It is made up of the following:
a) Space systems IT
b) General IT Support
(vii) Audit and Monitoring \& Evaluation

Audit and M\&E Services are directly under the supervision of the office the DG to ensure their independence:

## III. The Financial Implications of the Structure

7. Based on the proposed structure of the African Space Agency above (figure 1), the financial implications for the AfSA are presented in Table 1 below.

## IV. Proposed Implementation Approach

8. While space sciences, technologies and innovations are critical and provide a unique opportunity for the continent to collectively address socio-economic development and spur Africa's growth and transformation, the Commission is aware that there are often complex and cost intensive. Therefore a common continental approach, that is well coordinated and systematic will allow the sharing of the costs, expertise, and the enabling infrastructure (including data); reduction of risks and collective management of strategic programmes. The Commission therefore proposes a gradual 3 Step Phased implementation Approach for the establishment of AfSA over a period of five-years. The 3 steps are outlined below:

## Step 1

This is the formation period, which mainly includes setting up the facilities and offices and filling up key positions to for the initial operation of the Space Agency. The financial implication for Step 1 including the operational assets (IT equipment, cars and minimal programme support) is shown in Tables below:

## Step 2

Step 2 is an intermediate phase that will build on the positions filled in step 1 to boost the operations of the Agency. The cost implications for step 2 entails filling up the next fundamental positions in the third year providing a strong focus on programme implementation.

## Step 3

Beginning the $5^{\text {th }}$ year the AfSA will be fully operational with all key positions filled and staff members are on board according to Figure 1. The programs are defined and space missions gaining traction. The Strategic Plan developed and guiding the operations of the Agency. The total cost for this final step is shown in Tables below:
